Cutting: Cold, Ultrasonic or Crush | Welding: Radio-Frequency, High Frequency, Impulse, Hot Air or Wedge May require the use of welding tape. Please contact Mermet for more information regarding our welding tape product line. We recommend testing all cutting and welding methods prior to use to confirm they meet your individual fabric specifications.

5 Year Interior

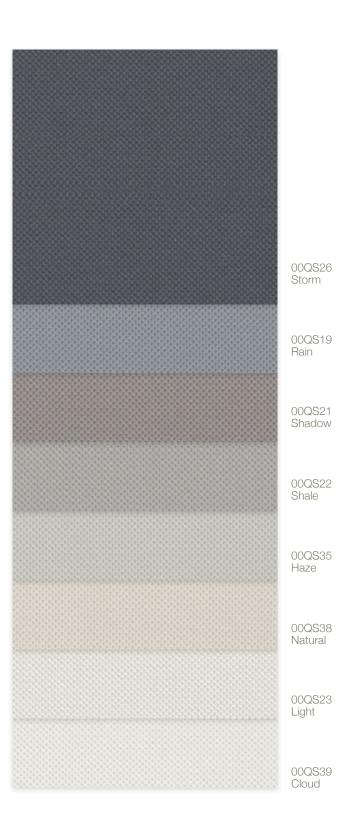

Regular light dusting with a feather duster is suggested. A hand-held vacuum with low suction may also be used. When vacuuming, avoid pulling or stretching the fabric. Rigorous vacuuming is not recommended since this could distort the fabric. Alternatively, dirt and debris can be blown away using compressed air or hand-held air dryer on the cool setting.

The fabric performance tests were conducted in accordance with ASTM E891 & ASTM E903-96: Total Solar Transmittance (Ts), Total Solar Reflectance (Rs), Total Solar Absorptance (As), Visible Reflectance (Rv), and Visible Transmission (Tv), Glass performance tests for Solar Heat Gain Coefficient (SHGC) were conducted using the Lawrence Berkeley National Laboratory Window NFRC certified software. SHGC % improvement for commercial applications is based on a standard commercial glass makeup of Double Glazing 6 mm / ½" air / 6 mm with low E on surface #2. SHGC for residential applications is based on a default residential glass makeup of 3 mm clear glass. /½" air / 3 mm clear glass. Results for SHGC were obtained using the center of glass. Acoustical performance was tested in accordance with ASTM C423-09a: NRC is Noise Reduction Coefficient, SAA is Sound Absorption Average. For up-to-date test results, performance specifications and larger samples, contact the Mermet Technical Department at: www.mermetusa.com.

Zero Waste Designer Shade Fabric

GreenScreen Evolve designer shade fabrics bring elegance, sustainability and control to every facet of the façade. GreenScreen Evolve is a 100%, non-pvc warp knit polyester shade fabric that contains a minimum of 78% Repreve® fibers made from 100% recycled post-industrial fiber and consumer plastic waste. The main differentiating factors for Evolve is its unique diamond knit pattern and modern color palette, custom selected to provide a higher level of clarity to the outside.

- 100% Recyclable-Zero Waste Product
- **PVC-Free**
- Crade to Cradle Certified[™] Bronze
- Contains up to 78% Repreve® fibers, made from 100% recycled post-industrial and consumer plastic waste
- Diamond knit pattern for beautiful views
- Made in the USA
- Red List compliant with HPD available
